POTS Consolidation

Product Description

POTS Consolidation will provide managed services for lines that a customer has with another carrier. This service allows the customer to simplify services by keeping all services with one provider for billing, inventory and help desk support.

POTS Consolidation is ideal for customers with a subset of POTS lines that cannot be converted because of contract situation or conversion availability.

We manage your communications infrastructure by receiving invoices for multiple carriers, and/or locations, consolidating the data and providing functional reports through a web accessed portal. In addition, we can provide a single remittance statement for all carriers, locations and services, allowing accounts payable to make one payment.

Additional benefits include world-class service levels and a comprehensive, easy to use customer portal to manage complex enterprise environments.

We leverage best-in-class technology and service offerings, combined with aggressive pricing and a world-class support infrastructure, to provide industry leading managed communications solutions to the business community.
