EnTelegent IP- PRI

Product Description

Service uses SIP VoIP technology to deliver a cost-effective substitute for traditional ISDN PRI (23b+d) service. IP –PRI offers coverage and price options that extend well beyond urban markets.

With our service, your enterprise will realize significant cost savings in communications while maintaining the value of your investment you have made in your legacy equipment. Compatible with existing communications systems, IP - PRI can seamlessly connect legacy and next-generation solutions and deliver end-to-end, integrated communications through our powerful cloud platform.

Our calling plans and services have been designed to meet the needs of business customers – including free unlimited local calling.

Key benefits include significant cost savings, service reliability and a VoIP migration path for legacy PRI services.

EnTelegent leverages best-in-class technology and service offerings, combined with aggressive pricing and a world-class support infrastructure, to provide industry leading managed communications solutions to the business community.
