Benefits:

- Better control costs
- Improved visibility of service environment
- Reduced complexity
- Cost Savings
- Enable Service Migration
- Upgrade Business Capabiliites

EnVision delivers a powerful set of tools that provides a single point of administration and control for all telecom providers, services, activities and invoices.

EnVision Delivers Value

Get a centralized inventory for wireless/wireline circuits, services, costs, contracts and invoices. EnVision reconciles billing to internal documentation for real-time reporting - accessible anywhere, anytime-via secure web portal.

Consolidated Billing

The EnTelegent consolidated billing and invoice processing structure reduces the number of bills and checks that have to be processed by your Accounts Payable resources!

Order Management/Trouble and Repair

Centralized service ordering, change management and repair tracking provide you a one-stop-shop for customer care and repair needs. EnTelegent will handle all calls, track them and see them through to resolution.

Optimization

Contract and service optimization brings you visibility and reporting for best-in-class sourcing, management and control. Our process delivers on-going cost reduction and supports technology transformation initiatives to ensure the service delivers a positive ROI.

Quarterly Value Report

EnVision also delivers optimization analyses of your existing telecom environment. EnTelegent will provide quarterly reporting to identify opportunities to improve services efficiency, highlight delivered savings and credit recoveries.
