

FIELD SERVICES

Let EnTelegent Solutions function as an extension of your IT Team for onsite infrastructure support.

WHO WE ARE

EnTelegent Solutions enables technology transformations by delivering a wide array of managed solutions, voice, data, and internet access to multi-location enterprise clients across the U.S. and internationally.

WHAT WE DO

EnTelegent's Field Services provides qualified on-site nationwide support of connectivity issues, structured cabling, and infrastructure deployment. Our Field Services technicians are fully vetted to ensure that their skill set matches your job specification.

Focus on what you do best while EnTelegent Solutions focuses on effective deployment and support of your technology.

Our experienced project management team can assist with the development of Scope of Work (SOW) statements, coordinate with client site personnel, and ensure that proper signoffs and documentation of work deliverables (including before/after photographs) are provided as agreed upon.

From short-term engagements to facilitate break-fix and structured cabling needs to complex deployments requiring highly skilled technicians for complex infrastructure

deployment, EnTelegent has the team and experience you can depend on for seamless implementation and on-time deployment.

Let EnTelegent enable your technology transformation.
