

Technology Solutions for When the Rubber Hits the Road Internationally

THE CHALLENGES

The client, a global automotive industry manufacturer, and retailer wanted to migrate from its legacy MPLS network with a Tier I provider to an SD-WAN solution. They required scalability, lower costs, and improved network performance visibility.

With 120 corporate sites widely disbursed across North America, South America, Asia, Europe, and Africa - the client needed a global, centralized solution.

In addition, the solution also had to integrate with their Managed Service Provider's systems.

THE SOLUTION

EnTelegent Solutions provided the client with:

- Diverse Access including one hundred circuits up to 1 GB as the primary; High Capacity Broadband as the secondary (or DIA at some critical sites)
- Proactive Monitoring/Management (NOCaaS)
- Centralized Circuit Inventory
- One Contract
- One Consolidated Bill
- One Secure Web Portal

BENEFITS

Scalability, Lower Costs, Visibility

EnTelegent Solutions implemented the client's migration which will enable them to scale freely, saving them 40% versus their previous spend. EnTelgent also empowered them with a global NOC, a secure web portal for visibility, and consolidated billing.

AT A GLANCE

Solution Mix

- Access (Broadband & DIA)
- Managed Network Services (Monitoring, NOCaaS)
- International Services
- Global Project Management

Benefits

- 40% Savings vs Previous Spend
- Peace of Mind Gained from a Global NOC
- Single, Secure Web Portal Visibility
- Consolidated Billing
- SD-WAN Scalability
- Seamless Integration

"EnTelegent's ability to competitively source, deliver and support diverse internet access globally made them the best choice for our client's needs. The communication and white glove project management are much appreciated."
