NETWORK SERVICES

NETWORK SERVICES connect users to applications and data in the network, streamlining data exchange. They enhance communication, collaboration, and customer service by allowing users to share information with their peers in real-time for greater productivity.

We have long standing relationships with an extensive network of over 100 carriers, enabling us to match your goals with the right NETWORK SERVICES solutions and provide best-in-class technology, cost, and performance.

- Tom Turpin, CEO EnTelegent Solutions

Top 5, Year-Over-Year VAR with 100+Carrier Relationships!

WAN/SD-WAN
- ENCOMPASS SD-WAN
- CISCO MERAKI
- FORTINET & OTHERS

VOIP/VOICE
- SIMPLE HOSPITALITY
- HOSTED UCAAS
- SIMPLIFIED VOICE
- ALL-IN-ONE POTS ALTERNATIVE

CONNECTIVITY
- WIRELESS INTERNET
- UNIVERSAL CONNECT
- DIA, ETHERNET, CABLE
- BROADBAND, DSL & MORE

WAN/**SD-WAN**

SD-WAN creates a virtual overlay of the physical WAN infrastructure, providing businesses with superior network management agility compared to traditional WAN. Inexpensive, flexible, and scalable, this solution allows for real-time changes to accommodate rapidly changing business needs.

VOIP/**VOICE**

We continue to support POTS users and offer a comprehensive set of VoIP Solutions designed to help Clients transition. These include hybrid solutions that bridge the gap between POTS and VoIP, as well as pure VoIP solutions that are easily scaled, cost-effective, and provide the advanced calling features Clients desire.

CONNECTIVITY

Dependable and cost-effective Connectivity solutions are essential to function at your best. If you are experiencing outages or other service issues or your current solutions are no longer cost-effective, reexamine your options with the help of one of EnTelegent Solutions' experienced Technology Advisors.
