

# CASE STUDY MINI

Connectivity, EnTele-SIM, MNS Monitoring, EnVision

## Integrated Home Healthcare Connectivity Solutions

01

### Overview

A Home Healthcare start-up needed connectivity services and nationwide scalability.

02

### Challenge

They needed Mi-Fi and a data plan for their 600+ corporate tablets to work dependably anywhere in the country.

03

### Solution

EnTelegent Solutions procured and installed reliable, low-cost broadband circuits, supplied Mi-Fi devices and filtered unlimited wireless internet to support existing cellular devices. MNS Monitoring was also implemented via EnTelegent's US-based NOC.

04

### Result

- As a result of EnTelegent's experienced team and extensive provider relationships, the Client achieved a fast-turn up of critical Connectivity within ten days.
- The Mi-Fi devices and the unlimited wireless ENTELE-SIM offering provided seamless cellular coverage nationwide from multiple carriers, while EnVision provided consolidated billing.
- MNS Monitoring gave the Client proactive troubleshooting and infrastructure repair assurance.

05

### Feedback

"EnTelegent seamlessly enabled our Client's office rollout, and they continue to meet and exceed the Client's responsiveness and project management expectations."

- EnTelegent Partner, Chicago, IL
